Hello, a pleasure. I got started on the craft of making websites since I was a child. By now, I've been involved on all aspects of modern web applications: servers and databases, yes, but also the nuances of interface and user experience. Connecting the dots and understanding the big picture is crucial, but every detail needs its proper effort and care.

I'm a good listener and I always strive for harmony. You can count me in when traversing the hard path of making a new idea unfurl into reality, and you can also sort of expect for me to give in a little bit more than expected, just because we're making it happen.

Toronja [jun 2020 —]
Full Stack Developer
Freelance initiative; design and development for local projects, from conception to deployment. Have used Svelte/React + Node.js for B2C solutions; Elixir Phoenix for B2B software.

Sabroso [oct 2020 - may 2022]
Front End then Full Stack Developer
Food management solution for the enterprise. Started out on the front, in charge of both clients' and chefs' applications; some months later got the opportunity to dwell into the backend and learn my way through servers, network requests and sql tables.

Übank (now Xerpa) [mar 2018 – aug 2020]
Front End Developer
Set up your rules and goals and save money your way. Used Ionic + Angular to build white-labelled savings applications for banks all over LATAM, which were downloaded several dozens of thousands of times; also sent many, many emails.

Other Non-Tech Experiences [aug 2011 – sep 2017]
I've also worked as a newspaper and magazine section editor, content manager, contract bridge teacher, hotel and library front desk clerk and website designer at several other companies before getting into software development.

2017 – 2018	**Universidad de Granada** New Media and Digital Journalism (Master's)
2009 – 2015	**Universidad del Azuay** Communication & advertising (Bachelor's)
Tech Skills	js（react	svelte	ionic	node	angular	typescript） elixir（phoenix） unix	git	sql（postgres	sqlite） aws	serverless	scrum
